

All you need to know about **TheHarvestingDay.eu!**

- **WHAT?** The Harvesting Day will be a routine in which a robot will collect Basic Metadata Descriptions (BAMDES) describing resources and tools, as published at their websites.
- **WHY?** To allow LR developers to enhance and ensure the visibility of their language resources and tools.
- **WHEN?** The first Harvesting Day will take place on **July 21, 2010** and will be then repeated periodically in an automatic manner.
- **WHERE?** You need to make your resources visible in your server. A package is already available on *The Harvesting Day's* website.
- **WHO?** Every resource and/or tool developer/provider is invited to participate. Harvesting results will be provided to the main resource and tools catalogues and observatories (ELDA/ELRA, CLARIN, META SHARE...).

Enhance and guarantee the visibility of your resources. Get ready for the Harvesting Day!
